Programmer — Jul 2019 - Apr 2022

Softworx (Mobileware Technologies) — Mumbai
Software Engineer — Mar 2017 - Jul 2019

Projects

Bhim Canara eMpower
Brief Description: Canara Bank offers Unified Payment Interface (UPI) app named "BHIM Canara-eMpower". This app empowers Canara Bank and other Bank customers to perform pay and collect transactions using a single mobile app. Users can operate their multiple Bank accounts using this single app. Virtual Address can be set for each of your Bank accounts and can be used while collecting money from anyone. No need to expose your account number, IFSC, Mobile Number to anyone. This app can also be used to pay and settle bills.

Technologies Used: Angular JS, Ionic Framework, JavaScript, HTML, CSS

My Role:

- Creating all the new functionality in the existing project and providing support for existing functionality.
- Creating new user interface screens and API integration

myLuminultra
Brief Description: LuminUltra is a biological diagnostic testing company. Widely recognized as a global leader in developing tests and reagents for environmental, industrial, and diagnostic monitoring. This cloud-based software has simplified the procedure of water testing as well as management and control of water data. The cloud-based data storage connected to a suite of mobile apps enables storage and reviewing of data remotely from anywhere, at any time. Furthermore, collecting data, analysing, sharing, and creating custom reports are just a finger click away.

Technologies Used: Angular JS, Ionic Framework, JavaScript, HTML, CSS.

My Role:

- Creating all the new functionality in the existing project and providing support for existing functionality for both mobile as well as web application.
- Creating new user interface screens and API integration

Libre
Brief Description: Libre by Nexus is a bond securitization program that assists immigrant detainees in securing immigration bonds without collateral. We do this using an innovative monitoring program to secure partnerships with sureties and immigration bonding companies. We are proud to have helped over 25,000 immigrant detainees be released from custody, be reunited with family and with successfully navigating the complex and broken immigration system. The Libre App for new and existing program participants that allows you to:

- Have 24/7 access to services
- Easily manage your account
- Make payments

Technologies Used: Angular, Ionic Framework, JavaScript, HTML, CSS.

My Role:

- Creating all the new functionality in the applications and maintaining them.
- Creating new user interface screens and API integration
- Admin console for the application

Skills

JavaScript **Angular** **HTML | CSS** **JAVA** **React JS** **Node JS**
